The sudden rebound on Monday, while our market was closed, from the panicky slump of Saturday, was attributed to more or less artificial measures of support with the purpose of averting the threatened failures, and the evidences since that necessary liquidation was proceeding

Citizens' Street Railway Fives and Belt Railroad Common Advanced One-Half Point Yesterday.

Interest in the local securities market confew sales of stocks or bonds have not been reported during the first three days of the week. There is a good demand for the stocks and bonds which have been most active recently, but there is not much of a disposition to make concessions, and consequently the volume of transactions is smaller than it has been for some time. Another thing which tends toward seem to be practically cleaned up at present prices. Street Railway is held at 87 in a few over 86 for it. The fact that the tax returns will be made a month earlier this year-March 1-has had something to do with the increased business. This demand seems about over now, and it is probable that for veloped in the stock market to-day and the a short time things will continue a little quiet.

There is a dewere disposed to play the short side of the higher than prices offered for them. This condition will adjust itself, investors will increase their bids, and stocks and bot.ds will begin to move more rapidly again. General Financial News.

Probably no other element in our complicated

financial position has been more frequently re-

ferred to, as a source of strength, than the ex-

panding export trade. The value of last

month's exports, as reported Tuesday, was the

largest ever reached in January. Similar records

were made in December and November, These

three months resulted in a total export trade

larger by \$59,000,000 than the same months a

year ago, and at the same time, imports de-

creased \$27,000,000. The effect on international

exchange is unmistakable. In every year from

1900 to 1903, inclusive, exchange on London has

stood at this date in the neighborhood of the

gold-exporting point. This week it stands nearer

the import than the export point. No such rates,

or anything like them, have been quoted at this

There was an idea that the big bulls were willing to make a better buying level, at the same time shaking out trailers, and by stimulating export demand through a return to a lower level of spot prices still further strengtheneing the spot position during the end season. Just before the close the decline to around 13.80c for July and 13.55c for March attracted a good demand from important Philadeplphia spot interests, and, while Sully continued to sell, prices recovered about 10 to 20 points of the loss, and the market was finally firm at a net decline of 50 to 60 points on months up to and including make a profit.
